

## Navigation Controls

Navigation in the Rutgers Jibe world is fairly straightforward and with a little practice you will have no trouble moving between rooms, sitting at a table or standing back up.

- To move your avatar forward use the 'W' or up arrow keys.
- To turn left or right use the 'A' and 'D' or left and right arrow keys
- Left clicking your mouse on the screen and dragging will also allow you to turn your avatar in the direction you drag.
- The 'S' and down arrow keys allow you to back up.
- To sit at a conference table mouse over the chair you wish to sit in and when you see a chair icon appear click the chair to sit in it.
- The mouse wheel will allow you to zoom in and out on your avatar.
- Right click and drag on screen to change the camera angle.
- In case you need a reminder on the controls click the '?' icon at the top right of the window and a description of all of the controls will pop up.

- To move between rooms simply walk through the doors. They will open automatically. However other than instructors you will only be able to enter the Main conference room and the breakout room you started in. Additionally you can 'teleport' between rooms by clicking the sign above the door.
- When taking a seat at the main negotiation table, please select a chair on your team's side of the room.
